Django Cheat Sheet

🕐 1 min read 📅 Dec 3, 2020

Here are some common commands you'll use while working with Django. If you can think of anything I should add, [let me know!](#)

Creating a New Project

```
django-admin startproject projectname
```

Add an App to a Project

```
python3 manage.py startapp appname
```

Starting the server

```
python3 manage.py runserver
```

Creating Migrations

```
python3 manage.py makemigrations
```

Migrate the Database

```
python3 manage.py migrate
```

Creating a Super User for the Admin Panel

```
python3 manage.py createsuperuser
```

Change Any User's Password

```
python3 manage.py changepassword
```

Collecting Static Files Into One Folder

```
python3 manage.py collectstatic
```
